

Ultra high flow control valve is made in the USA!

Highly effective catalytic carbon for enhanced chloramine and organic chemical reduction

Natural Clinoptilolite reduces ammonia, silt, sediment and much more.

Vortech mid plates provides the highest reduction rates of chlorine and chloramine due to the packed bed configuration.

Commercial grade cation resin for the reduction of hardness mineral provides you with the ultimate luxury water!

Lower Vortech plate for the ultimate in effective backwashing and flow rates!

Our best water treatment system uses multiple stages of filtration to reduce scale, hardness, chlorine, chloramine, heavy metals, pesticides and many other contaminants! High flow design and high purity medias ensure the most luxurious water treatment system for your water quality improvement needs. Vortech bottom and mid-plates ensure the highest flow rates and most efficient backwashes. Equal distribution of water across the media enhances your water quality!
